Snapspot is a one stop platform on which to simplify the process of managing your home away from home. It is a mobile and desktop management facility which will encompass many business functions, from cross platform communication to maintenance and repairs, cleaning, and bookings. The platform includes awesome integrated calendars, payment facilities, external integrations and so much more. Snapspot will be marketed to homeowners looking for managers to manage their away homes, to property managers, and to vetted, capable, honest, and where required, certified service providers who will get the job done properly. The Snapspot platform can assist in the management of your leisure property functions on the run, from anywhere a whole lot easier. Move to a more, dynamic, efficient, and technologically capable way of running your away home. Join our awesome digital ecosystem to simplify your world.

What to expect from our platform if you own a leisure property on the Garden Route.

The initial launch locality of the Snapspot platform will be George, Wilderness, Buffelsbaai, Sedgefield, Brenton and Knysna.

1. Our easy-to-use platform includes both desktop and mobile device functionality.
2. Database of property managers in your area to manage your away home.
3. Stay on top of what happens at your property from bookings to arrivals and departures, to property maintenance, repairs, and cleaning, as well as to laundry and garden/pool services.
4. See your local area information including restaurants, outdoor entertainment services, leisure activities, nearby medical facilities, veterinary services, gyms etc.
5. Request services and quotations on the maintenance and cleaning of your property via your mobile or desktop device.
6. Communication and notifications between homeowner, property manager, and service providers.
7. A single property with rentable units, or multiple properties may be added to your profile.
8. Automated Snapspot calendar to manage your property.
9. Integration from Nightsbrige for their members if required. Booking information to automatically update your individual Snapspot property calendar, as well as your Snapspot master calendar for those of you with multiple rental properties.
10. Payment portal to simplify payments between parties.
11. Wallet facilities between manager and property owner for property incidentals, as well as a shared folder for easy uploading of slips and invoices on your mobile device.
12. Internal booking functionality for bookings on your properties if required.

13. Manager/Tenant portal to enable tenants to view your property information/instructions, booking info, rules and inventory, area information, restaurants, local attractions, and nearby medical facilities. Manager/tenant communication and notification functionality.
14. Homeowner/Manager portal and shared property calendar to enable clear communication and information sharing, regarding quotations, maintenance, and cleaning as well as internal and external bookings on each property.
15. Supplier/Manager portal will enable managers to upload preferred suppliers, request quotes and upload images, communicate and arrange cleaning and maintenance/repairs on your property. Suppliers will be able to generate, upload and amend quotes on the go, via our mobile and desktop functionality.
16. Add your income and expenditure to your easy to use, financial summary page
17. A nominal monthly fee of R150 per property with a max of six rentable units/rooms will be levied.

For those property owners not letting their homes, the platform offers a great deal of functionality as detailed above for the efficient management of any maintenance, repairs, and cleaning of your property.
