

# Snapshot

*Your home away from home management solution*

Snapshot is a one stop platform on which to simplify the process of managing a home away from home. It is a mobile and desktop management facility which will encompass many business functions, from cross platform communication to maintenance and repairs, cleaning, and bookings. The platform will include awesome integrated calendars, payment facilities, external integrations and so much more. Snapshot will be marketed to homeowners looking for managers to manage their away homes, to property managers, and to capable, honest, and where required, certified service providers. We will also enlist managers with existing property portfolios who would like to upload and manage their properties more efficiently. The Snapshot platform can assist in managing your business functions on the run, from anywhere a whole lot easier. Move to a more, dynamic, efficient, and technologically capable way of running your enterprise. Join our awesome digital ecosystem to simplify your world, increase your customer base, and find new work opportunities.

What to expect from our platform if you provide home services on the Garden Route's George, Wilderness, Buffelsbaai, Sedgefield or Knysna. The initial launch locality of the Snapshot platform.

1. Our platform offers both desktop and mobile functionality.
2. Generate work outside of your traditional channels by registering as a service provider or supplier on the Garden Route Snapshot platform.
3. Join our service provider and supplier database, which will be available to all property managers and homeowners registered on the Snapshot platform.
4. Amongst many other features on the Snapshot platform, customers will be able to manage the maintenance, repair, and cleaning of all properties they administer. This using our unique maintenance, repair, and cleaning functionality. They will be able to identify maintenance issues, upload images to their mobile devices, and will immediately be able to request quotations from approved and registered service providers/suppliers on our platform. Property owners will be able to instantly approve or decline quotations, which expedites the process of doing business.
5. Communication and notifications between yourselves, homeowners, and property managers, keeping property specific communication and documentation in one place.
6. Mobile master calendar to manage your internal and external workflows.
7. Bank payment portal to simplify payments to your account.
8. Suppliers to be able to generate, upload and amend quotations on the go, or at your desktop via our dual mobile and desktop functionality.

9. Only capable, well regarded and if mandatory, certified service providers, suppliers, or businesses may register on the Snapspot platform. We vet all applications prior to profile and business details going live.
10. We aim to brand Snapspot as the go to place for excellence in service, price, and delivery.
11. For the first six months the Snapspot platform is free. Only bank transaction fees on payments made to your account will apply.
12. After six months you will be prompted to sign up and register as a permanent Snapspot member if you so choose.

Your ID no, any job specific required compliance certifications, company details and banking information for incoming payments will be required. Company details are shared with our subscribers, personal and banking information is not. Become a Snapspotter to generate more work and simplify your world.
